

# Yodi Fadhil A

## Frontend Developer

### About Me

My classmates made fun of me. They said that I would never work as a software developer. In 2017, after completing my vocational training, I attended a software interview at a technology company in Bali, Indonesia. I take it as a challenge.

I love the energy of the team. I love this project. They accepted me, and I said yes to the job offer.

I started working at a technology company in August 2018.

I received great support from my team, and my boss helped me work on my first lines of code at the company.

After many hours of work, I discovered that my passion was front-end development.

### Skill

- Slicing Design ( Understanding UI/UX improvement
- Connected API /Consume/Send to API like post, get,
